About Company

Dexter's Lab Corp has diversified into various sectors of the cannabis and hemp industry in the United States and Colombia since 2018. We represent cannabis-licensed companies in Colombia, managing the strategies and commercialization of seeds, biomass, extracts, and medical flower.

Our American laboratory partners collaborate with us in research and development, focusing on nanoscience innovations involving various exotic botanical extracts, including medical cannabis and mushrooms extract.

We have exclusive trade secrets and formulations in nano-soluble emulsion as an aqueous solution ingredient for our Dexter's Lab Drinks beverage company.

Vision & Mission

Company Vision

We envision ourselves diversifying successfully as a low-cost producer through various collaborations in research and development for Amazonian botanical nano-extraction.

Our aim is to innovate new ingredients and formulate undiscovered products that benefit the human body. We foresee tremendous success for our beverage company, Marimba Energy Drink, both in Colombia and Internationally.

Our compelling brand, with its unique story and formulation, stands out in the market with no competition.

Company Mission

We strive each day to persistently explore potential avenues for the sustainable cultivation and commercialization of cannabis and hemp in Colombia.

From our GMP standard cultivation alliances to our research and development of nano-emulsion formulations in aqueous solutions, we aim to provide high-quality ingredients for multinational companies in Colombia and worldwide.

We are committed to the evolution of the cannabis market, and we foresee great success in our Dexter's Lab Drink beverage company by offering innovative formulas, ingredients, and final products.

Medical Cannabis

Dexter's Labs currently represents the strategic and commercial representation of three licensed cannabis companies in Colombia, each focusing on different paths of commercialization.

Our primary focus at present is on our pharma-grade indoor cannabis, which follows a rigorous GMP compliance process. We operate two facilities: a state-of-the-art greenhouse spanning over 10,000 square feet, dedicated to producing high-grade cannabis, and a 1,000 x 1,000 square foot indoor facility equipped with full-spectrum lighting.

This indoor facility boasts high yields and high cannabinoid potency, ensuring superior product quality and consistency.

Medical Cannabis

We specialize in trade and consulting within the medical cannabis industry in the Republic of Colombia, offering strategies that can reduce your current operation costs by 60% - 80% and optimize your supply chain.

Cultivation

- CBD
- CBG
- CBC
- THC
- CBN
- HEMP

Required Licenses

- ICA
- MINSALUD
- MINJUSTICIA
- FNE

LICENSE & SUSTAINABILITY

Depending on the type of cannabis license obtained, our commercialization strategy will vary. Colombia's local laws pose limitations on domestic commercial sustainability within the country but allow for the exportation of final goods containing cannabinoids, including supplements, food and beverages, and raw materials such as hemp and cannabis isolate. Therefore, having a facility with versatile integration for raw material control is crucial for optimizing commercialization efforts and reducing operational costs.

GROWTH POTENCIAL

Our current capabilities as a trading and broker-dealer company allow us to allocate multiple hectares of cannabis-licensed land for expanding potential projects in the hemp and cannabis industry.

Laboratory

Dexter's Labs relies on our American partnership laboratories for research and development, as their science and technology are significantly more advanced than those in Colombia.

Local laboratories in Colombia offer low to medium scale extraction production services with low yields and high service costs. In contrast, the United States provides highly knowledgeable industrial production with lower costs compared to the Colombian extraction market.

By leveraging the expertise and technology of our American FDA approved partner, GSI Inc., we can acquire advanced formulations for soluble advancements across various industries, including cosmetics, medical, food, and particularly the beverage sector.

DEXTERS
LAB DRINKS

Beverage Company

Dexter's Lab Drinks was established with the purpose of formulating innovative beverage products. We have partnered with Gold Star Innovators Inc (GSI Inc), an FDA-approved laboratory and manufacturer based in Florida, specializing in global Non-Alcohol Spirits and Ready-to-Drink beverages.

GSI Inc. is poised to transform the FMCG and Wellness Beverages sector by creating industry-leading formulas and leveraging their proprietary blends and trade secrets in the Non-Alcoholic sector.

Dexter's Lab Corp entered a joint venture with GSI Inc., securing an exclusivity contract for all GSI formulations in the Latin American region. This strategic partnership provides our company with a significant advantage in acquiring innovative formulations for exciting new beverage products and brands.

DEXTERS
LAB DRINKS

Collaboration

After months of research and development to perfect a line of formulas, Dr. Ram Ramcharran, co-founder and Chief Technology Officer of Gold Star Innovators Inc., and Dexter Rosa, founder of Dexter's Lab Corp, met in Colombia where several innovative formulas were developed.

Among these is DXAMRIT, a groundbreaking formulation that combines the richness of hemp, terpenes, and botanical extracts, all transformed into nanoscale particles and seamlessly integrated into an aqueous solution.

Access to all GSI Inc. formulations opens up possibilities to diversify the client base and could potentially add significant value to the sustainability of the Colombian cannabis and hemp industry. Dexter's Lab Corp holds exclusive rights to all formulations in LATAM.

Our Ingredients

BOTANICAL EXTRACT

- Hemp extract
- Hemp seed extract
- Ginger extract
- Mushroom extract
- Garlic extract
- Turmeric Extract
- Peppermint extract
- Sage extract
- Cinnamon extract

MULTIFUNCTIONAL

- Calming
- Chill
- Energy
- Focus
- Creative
- Sexual Enhancer
- Recovery
- Sleep

MEDICAL CANNABIS

- CBD nano Soluble
- CBG nano soluble
- CBC nano soluble
- THC nano soluble

CONVERSIONS

- Delta 8
- Delta 9
- HHC
- THC0

TERPENES

- Watermelon
- Watermelon Raspberry
- Peach
- Orange Blossom/Cleminte
- Gelato Cake
- Punto Rojo
- Purple Punch
- Grape Ape
- Apple Fritter
- Pina Colada

Research and Development

Botanical and Psychedelic research

Our research endeavors into botanical and psychedelic compounds originate from the depths of the Amazon rainforest, where our collaboration with indigenous Shamans yields access to a myriad of exotic medicinal plants. These botanical treasures hold promising potential in alleviating a spectrum of afflictions, including depression, anxiety among the terminally ill, substance use disorders, dementia, anorexia, and chronic pain.

Harnessing advanced extraction techniques in Colombia, we isolate and concentrate active ingredients from these Amazonian plants. Our innovative use of nanotechnology facilitates the transformation of these compounds into nano-sized particles, which are then integrated into natural, aqueous formulations.

This approach underscores our commitment to developing a line of products that are not only effective but also inherently sustainable and health-promoting.

Filling Machine

In Antioquia, we have access into a partnership to a 10,000 square foot beverage filling plant with advanced capabilities. Our PET and glass filling lines can produce up to 12,000 units per hour, while our can line can produce 10,000 units per hour.

We source high-quality base ingredients from leading flavor houses around the world. Our plant's performance in the beverage industry is exceptional, fulfilling client orders for brands such as Postobon, Budweiser, Hatsu, Brus, and Mil976.

We are also excited to soon include Dexter's Lab Drinks products among our partners esteemed clientele.

MARIMBA

ENERGY DRINK

OUR BRAND

DEXTERS
LAB DRINKS

MARIMBA ENERGY DRINK

Marimba Energy Drink features an enriched and approved original flavor, zero calories, and is fortified with over five vitamins.

MED (Marimba Energy Drink), with its trade secret formulation DXAMRIT, aims to provide a significant social impact by highlighting its heritage story and contributing to the sustainability of the Colombian cannabis & Hemp industry through the purchase of raw materials from local farmers.

Marimba Energy Drink will soon launch with its original flavor, followed by two additional flavors: Mango Biche (Mango Energy Flavor) and Punto Rojo (Jamaican Flower Energy), both representing symbolic genetic varieties in urban Colombian cannabis culture.

DEXTERS LAB DRINKS

CAÑAMO

CAÑAMO

CAÑAMO DRINKS

Cañamo Drinks is a carbonated soda infused with our proprietary DXAMRIT, a groundbreaking formula that combines the richness of hemp, terpenes, and botanical extracts, all transformed into nanoscale particles and seamlessly integrated into an aqueous solution. This innovative approach ensures superior quality and bioavailability, offering a unique and refreshing beverage experience.

We are excited to introduce four bold flavors: Ginger Beer, Rosa Andina, Punto Rojo, and Mango Biche. Each flavor is designed to provide a delightful and refreshing experience, perfect for enjoying with friends on a pleasant afternoon. Cañamo Drinks promises to deliver not just taste but also the benefits of its advanced formulation, setting a new standard in the beverage industry.

GINGER WEED

Research and Development

We are currently developing multiple wellness drinks using our proprietary technology and formulas. Our aim is to create over 10 beverage brands, each featuring its own unique blend for natural functional beverages.

Products we are working on:

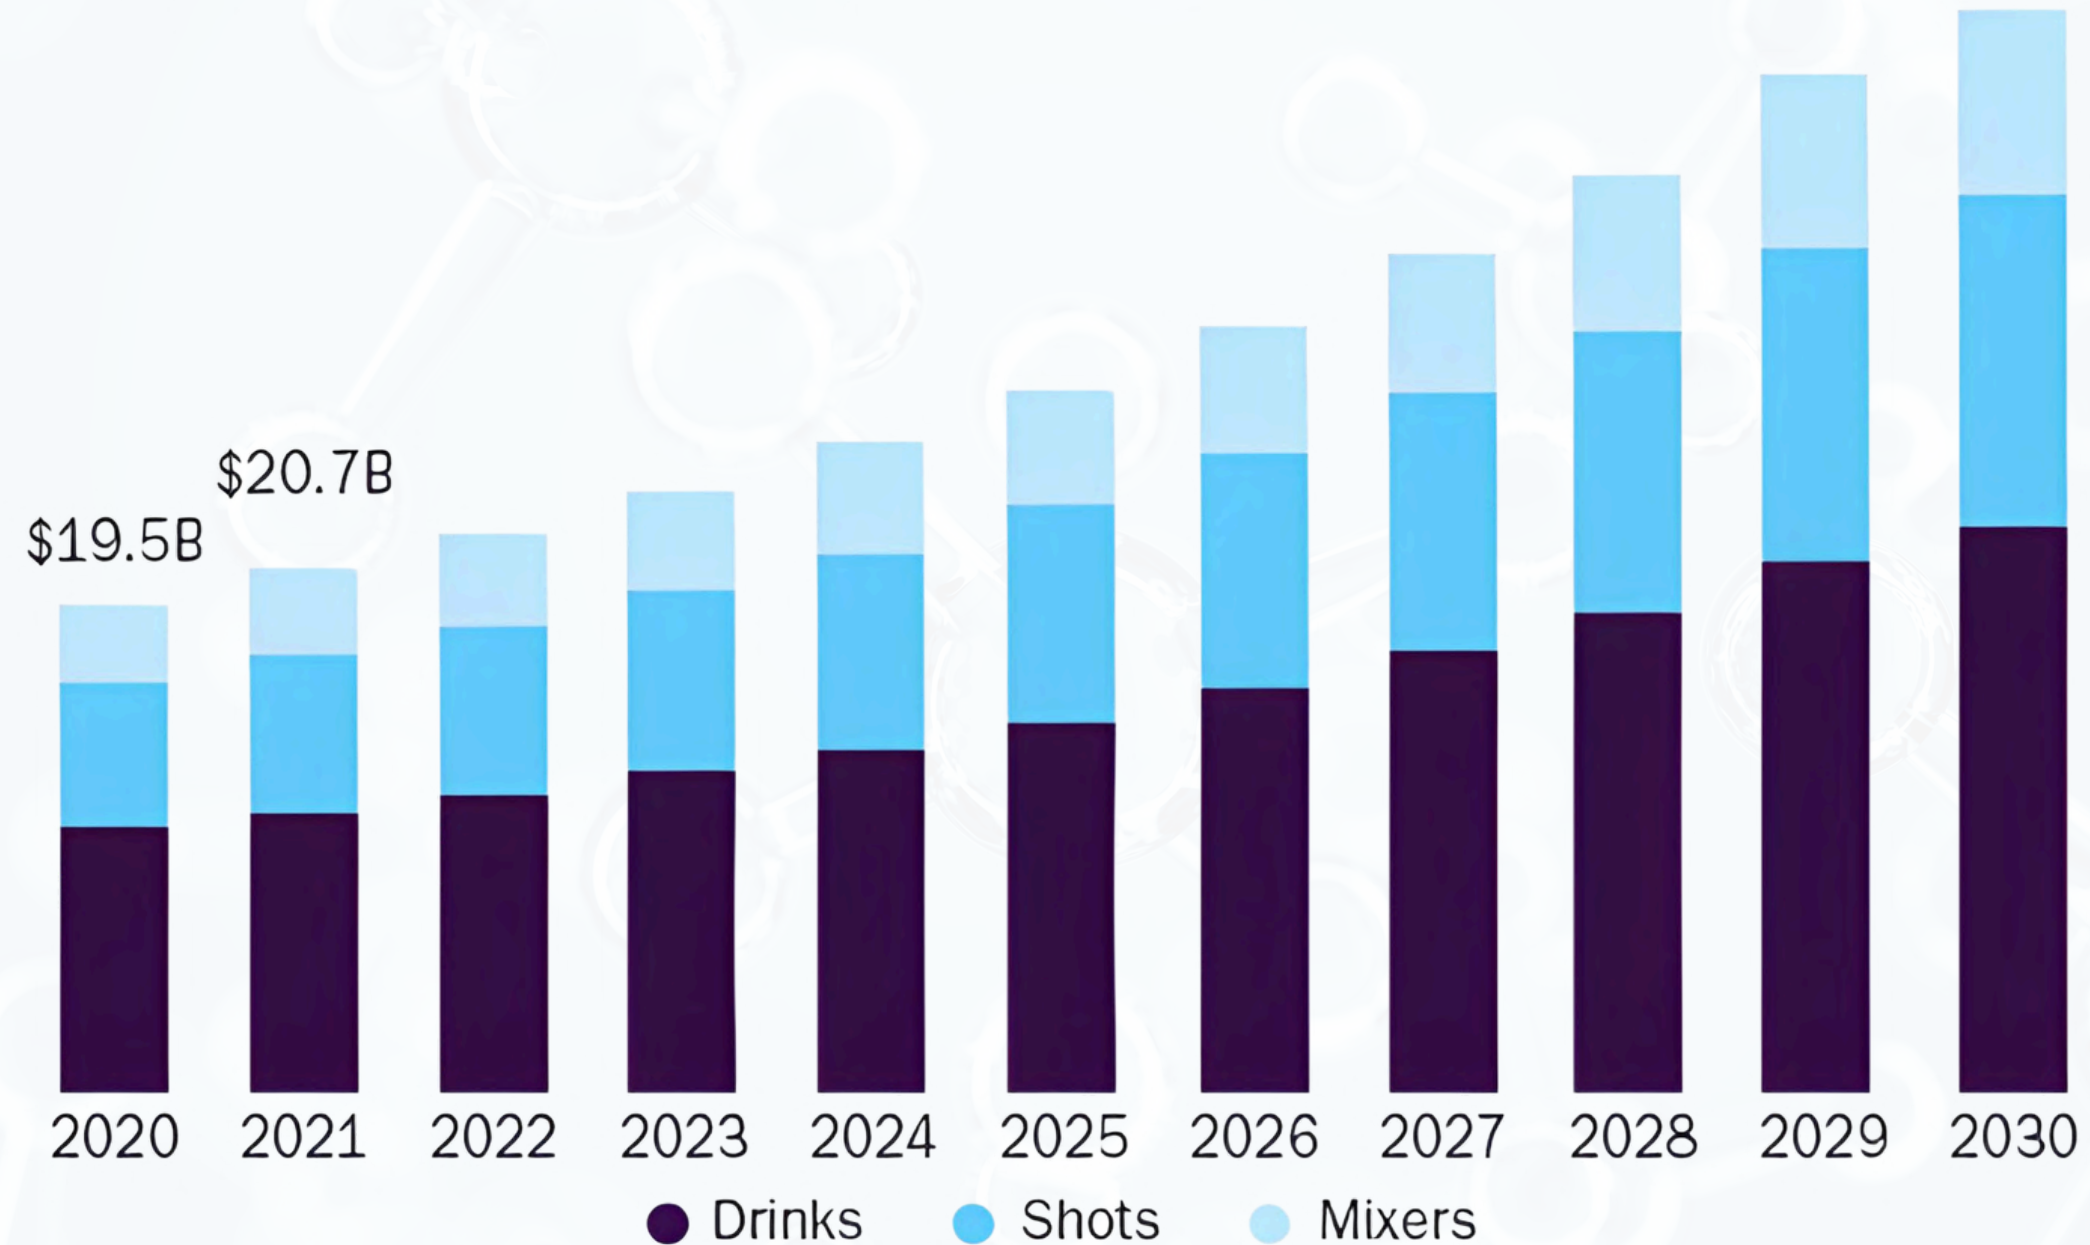

- Flavor and Vitamin infused HEMP water
- Formulated Water with Au + Vitamins
- Mushroom extract elixir soft drinks
- Mushroom extract coffee
- Non-Alcoholic spirits
- Botanical blend formulations
- RTD multifunctional beverages
- RTDs: Cold coffee, mushroom, green tea.

UNITED STATES MARKET

U.S. Energy Drinks Market

size, by product, 2020 - 2030 (USD Billion)

The U.S. Market will Grow At the CARG of: 8.4%
The Forecasted Market Size for 2030 in USD: \$177.58 billion

ENERGY DRINKS STATISTICS OF COLOMBIA 2017-2022

La República

RADIOGRAFÍA DE LAS BEBIDAS ENERGIZANTES EN COLOMBIA

The energy industry in Colombia moved around **157.6 million liters of the drink in 2022**. This is equivalent to an **increase of 115.7%**, because in 2017, the movement of this product was 73 million liters. In addition, **it is expected that 226.5 million liters will be sold by 2027, which would represent an increase of 43.7%**.

This market had approximate profits of \$1,052 million COP in 2022, which represented an **increase of 108.1%** compared to 2017, since at that time profits were \$505.7 billion COP. **It is expected that by 2027 this market will move more than \$1,560 million COP.**

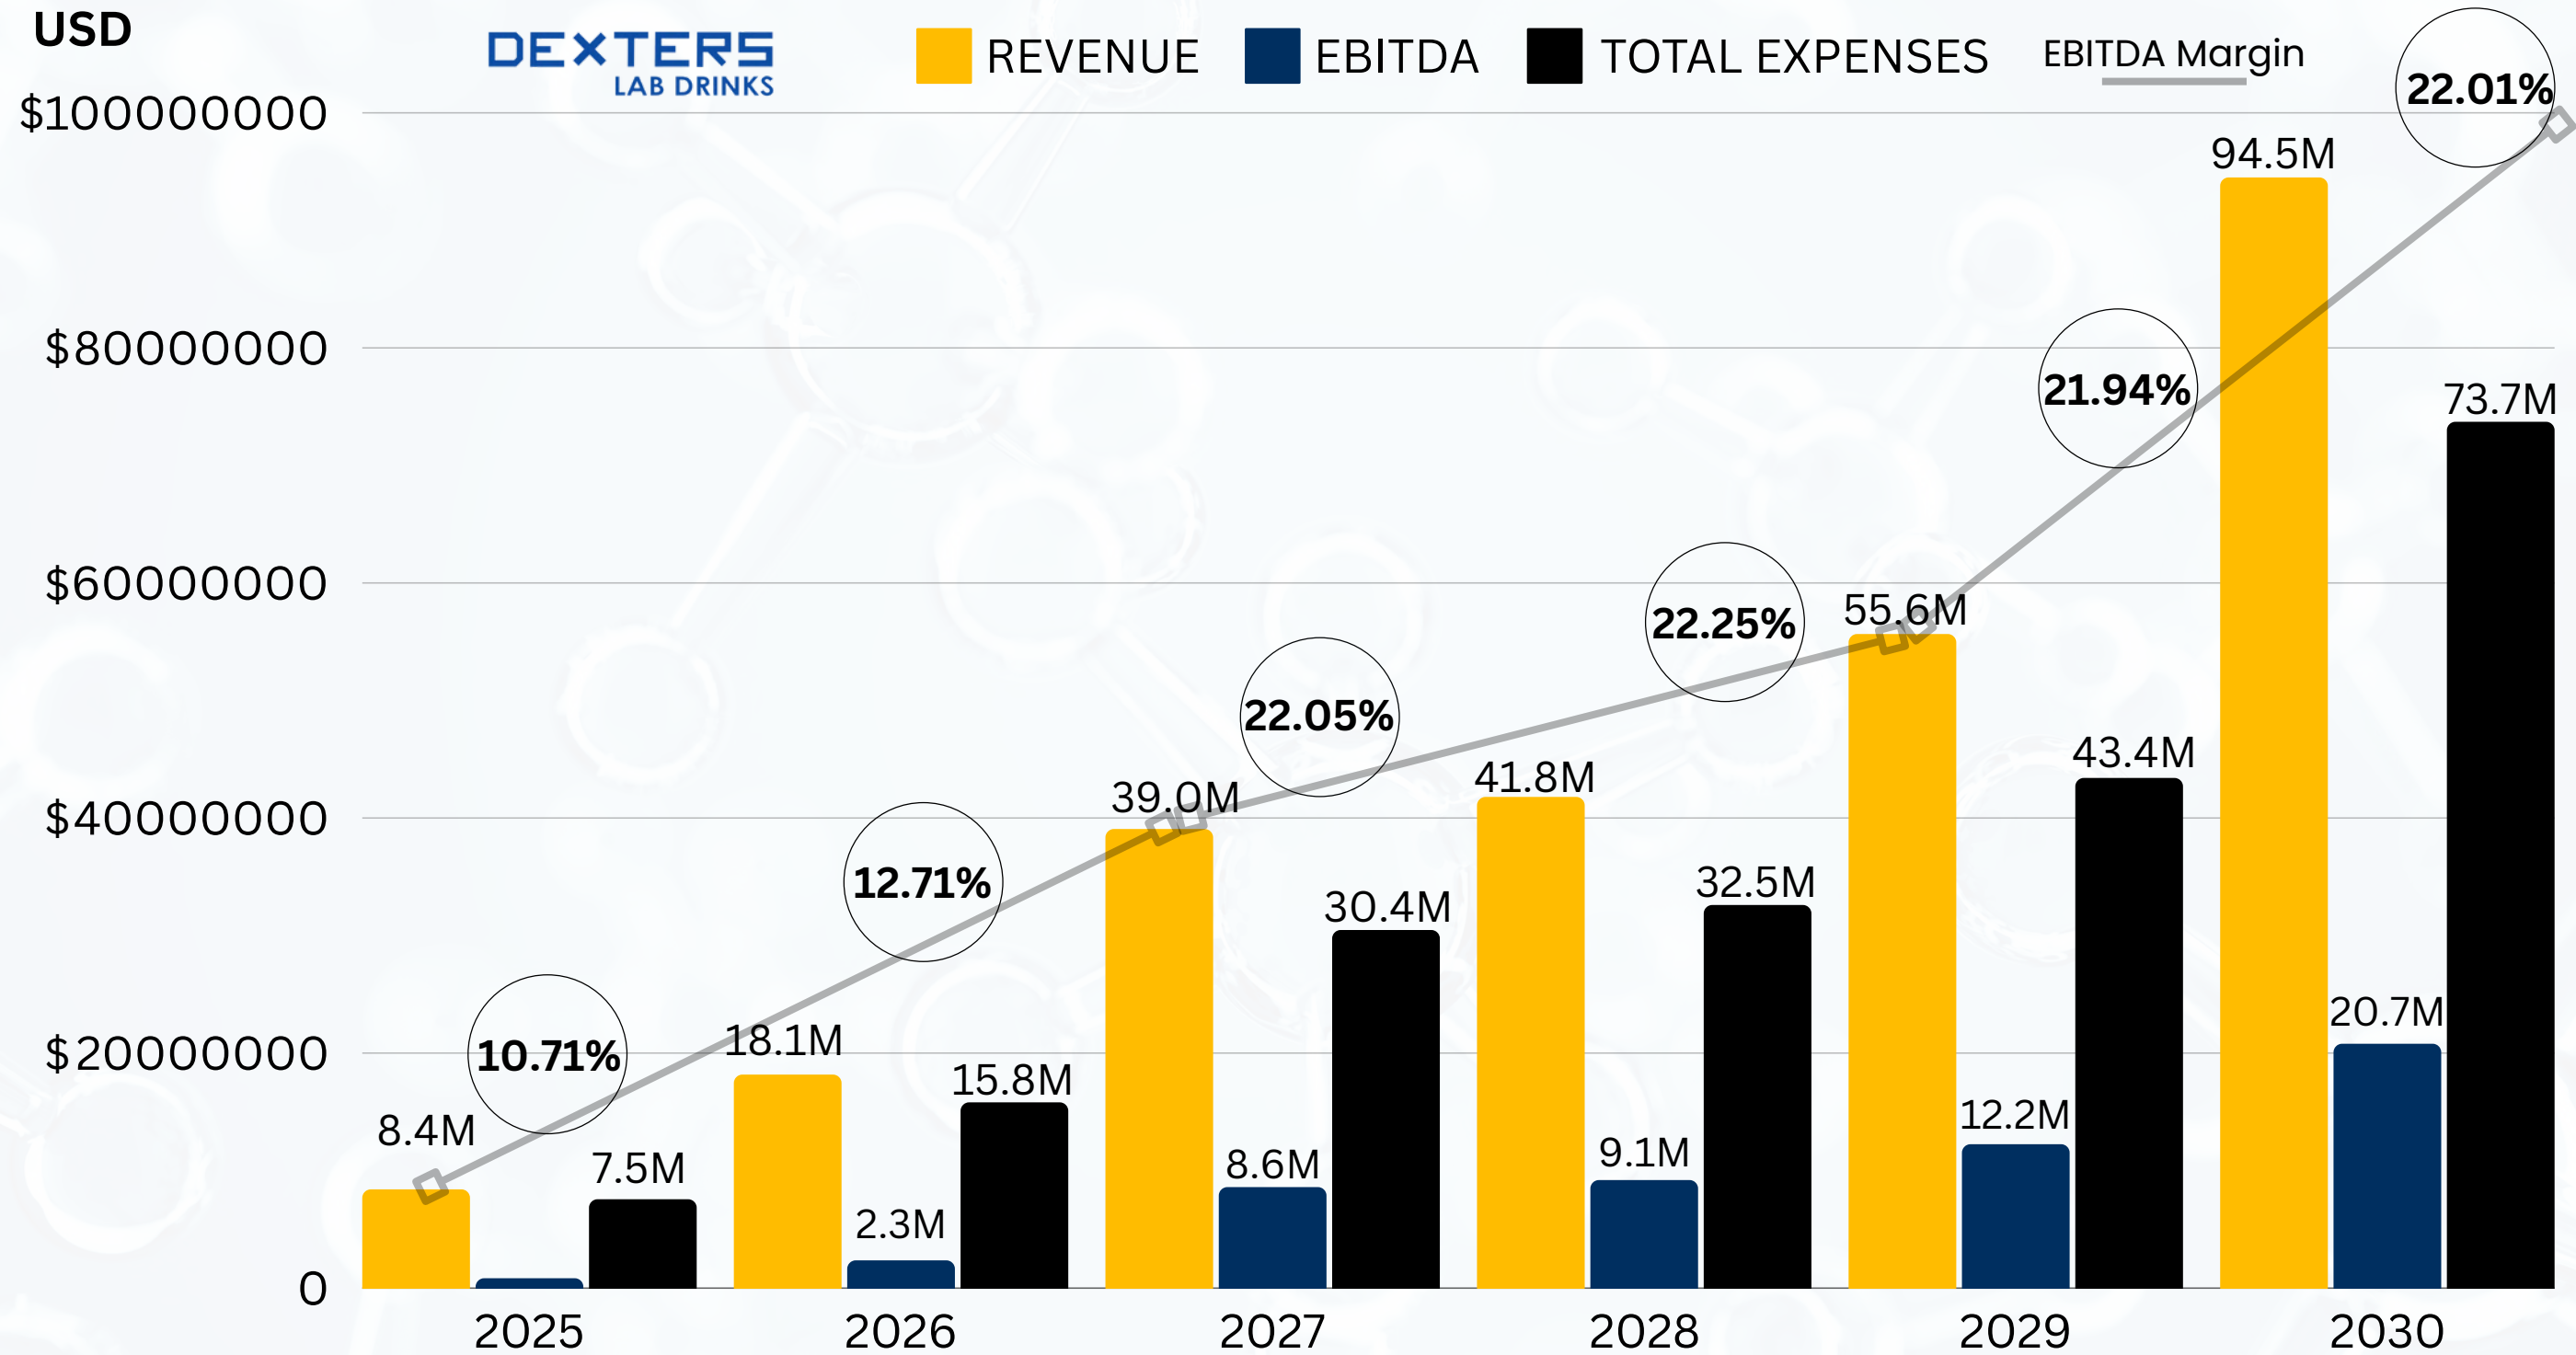

EMPRESAS QUE LIDERAN

Fuente: Euromonitor Gráfico: LR-MIN

The leading company in this industry is Postobón with its SpeedMax brand and a 55% share in volume and 51% in value. This company is followed by industry giants such as Quala, with 35.4% and brands such as Vive 100; and finally Red Bull, with 11.3%. Monster does not disclose performance data.

FINANCIAL PROJECTIONS

These financial projections are based on the most recent quality of life survey by the National Administrative Department of Statistics (DANE), which indicates that 31.5% of the Colombian population consumes a sugary drink two to three times a day, a category that includes our product. Our expected projections are based on capturing just 1% of the total Colombian energy drink consumption. This conservative estimate optimizes our chances to increase market penetration as we foresee investment in marketing to achieve wider population visibility, thereby enhancing our product's consumption percentage.

Social Impact Project
Non Profit

Fundación Manos Arriba

Hands Up Foundation

Dexter's Lab Corp has pledged to initiate Hands Up Foundation a non-profit organization dedicated to supporting underprivileged young children living in dangerous red zones with inadequate educational resources.

Each year, thousands of young children lose hope due to a lack of support, leading many young boys to join guerrilla forces and young girls forced to sex trafficking. Our mission is to relocate these children to safer environments where they can access quality education in Colombia.

At Dexter's Lab Corp, we aim to change the lives of hundreds of young dreamers seeking opportunities. Dexter's Lab Drinks will soon launch a beverage campaign, with a percentage of all proceeds donated to this cause, supporting those who aspire to receive an education and build a better future.

Meet Our Team

Dexter Rosa

Founder & Ceo

Founder and Ceo of Dexter's Lab Corp, brings 15 years of experience as an entrepreneur. He is currently the mandate of the Colombian Space Agency as well as Westmount Capital, a financial firm from Geneva, Switzerland.

John McConkie

Chief financial officer

John McConkie, former broker at Stuart-James Company, excelled as a stockbroker during the dot-com era, working for brokerage capital firms throughout the 90s. He is an expert in finance management.

Dr. Ram Ramcharran

Chief technology officer

Dr. Ram Ramcharran, CTO, has dedicated two decades to medicine, specializing in nano technology formulations with infusions of cannabis, terpenes, and mushrooms, co-founding Gold Star Innovators Inc. to innovate non-alcoholic beverages.

Jorge Rivera

Filling plant director

Jorge Rivera has 30 years of experience in the bottling industry as an engineer. He spent 10 years at Coca-Cola before founding his own highly successful automated filling plant with state-of-the-art equipment.

Contact Us

At Dexter's Lab Corp, we highly value your feedback. Please do not hesitate to contact us via email regarding the purchase of raw materials and ingredients. We also welcome ideas and investment opportunities. Kindly note that we exclusively collaborate with licensed companies within the industry. Thank you for your attention.
